

Jason D. Moss

Drupal Developer

Location: Ottawa, Ontario, Canada K1K 4Z2

Telephone: (867) 765-8415

Email: work@jdmlabs.com

Website: <https://www.jdmlabs.com>

Profiles: [Behance](#), [LinkedIn](#), [Github](#), [GitLab](#)

OVERVIEW

A multi-faceted and experienced web developer with over 18 years of expertise in planning, developing, implementing, and maintaining modern websites. Adept in Drupal 10/11 development, multilingual site configuration, custom module creation, and performance optimization. Skilled at applying secure coding practices and deployment automation to ensure scalable and efficient web solutions.

Committed to supporting organizations in transforming their web environments and defining robust web strategies, strictly adhering to open standards and conventions.

KEY SKILLS

DRUPAL EXPERTISE

- Full-cycle Drupal 10 and 11 development, including migrations from Drupal 7, 8 and 9
- Multilingual website configuration, including domain detection and language switching
- Custom module creation and theming using Twig templates
- Advanced Views configuration and custom content type design

SECURITY AND PERFORMANCE OPTIMIZATION

- Implemented security best practices, ensuring compliance with DSAs
- Conducted audits to identify vulnerabilities and optimize performance
- Enhanced front-end and back-end performance using caching, database tuning, and API integrations

DEPLOYMENT AND AUTOMATION

- Experienced in Docker-based application containerization and deployment
- Built CI/CD pipelines using Git and Azure DevOps for automated workflows
- Managed Linux-based environments and cloud infrastructure

TECHNICAL TOOLS AND TECHNOLOGIES

Languages:	PHP 8, JavaScript (ES6+), HTML5, CSS3
Frameworks/CMS:	Symfony, Drupal 7–11, Craft CMS, Laravel, WordPress, B2evolution
Databases:	MySQL/MariaDB
Other Tools:	Git, Docker, Azure, Apache, ElasticSearch, Solr, W3C Standards, WCAG Standards
